CAREER OBJECTIVE

Analytical and impact-driven professional with experiences in large-scale data handling, dashboarding, and automation. Seeking an MIS Executive role where I can apply advanced Excel, SQL, BI dashboards, and data-analysis skills to deliver accurate reports, actionable insights, and process improvements that drive business decisions.

EDUCATION

- **NRI Institute of Technology - GPA: 9.0/10.0** September 2022 - Present
Bachelor of Technology in Artificial Intelligence and Machine Learning Vijayawada, India

PROFESSIONAL EXPERIENCE

- **Centre for Development of Advanced Computing (C-DAC Hyderabad)** August 2025 - Present
AIML Intern - On-Site Hyderabad, India
 - Designed and deployed LangGraph-driven AI prototypes for workflow automation and scalable data processing.
 - Collaborated with senior analysts to interpret patterns and trends, strengthening my ability to generate insights that directly supported decision-making processes.
- **AP State Civil Supplies Corporation Limited (APSCSC)** June 2025 - August 2025
Project Intern - On-Site Vijayawada, India
 - Worked extensively with large-scale datasets exceeding 4 lakh rows, applying rigorous data cleaning, validation, and transformation techniques to maintain high data accuracy.
 - Managed multi-lingual data by performing large-batch transliteration and quality checks, utilizing Python automation and Advanced Excel to reduce processing time and eliminate inconsistencies.
- **HCLTech** April 2025 - June 2025
AIML Intern - Remote Vijayawada, India
 - Built a multimodal assessment engine using facial recognition, vocal feature extraction, and sentiment analysis to streamline and automate candidate screening.
 - Built and maintained candidate evaluation dashboards using Python, React.js and Excel, enabling recruiters to quickly assess applicant readiness based on data-driven metrics.

PROJECTS

- **AI-Powered Subjective Assessment System** [🔗](#)
Tech Stack: Python, Flask, LangGraph, LLaMA 3.2 1B Instruct, SBERT, Cross-Encoder, SQLite
 - Designed a structured data pipeline using Python, pandas, and Flask to collect, clean, and score student answer data, later converting it into automated performance dashboards and reports for exam evaluators.
 - Implemented text similarity models and integrated metrics into organized tables, showcasing my ability to generate and present structured insights—core to MIS workflows.
- **AI-Powered Resume Evaluation System** [🔗](#)
Tech Stack: DeepFace, Librosa, NLTK VADER, ML algorithms, Flask, MongoDB, React
 - Developed backend data-processing scripts using Python and MongoDB to extract, standardize, and analyze resume information, enabling dashboard-ready KPIs for recruitment decision-making.
 - Built interfaces that present skill-match scores and applicant summaries—highlighting experience in building reporting systems similar to MIS structures.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, OOP through Java
- **WebDevelopment:** HTML, CSS, JavaScript
- **Frameworks & Libraries:** NumPy, Pandas, Matplotlib, Flask, scikit-learn
- **Databases:** MySQL, MongoDB, MS SQL Server
- **AI/ML:** Machine Learning, Deep Learning, NLP
- **Tools:** Git, Power BI, Excel

PUBLICATIONS, ACHIEVEMENTS AND CERTIFICATIONS

- **Certifications:** Oracle AI Foundations, Cisco Data Analytics, Oracle Gen AI Professional, Wipro Data Science
- **IEEE Publication:** Published a research paper titled “AutoGrader: ML NLP-Based Handwritten Exam Evaluation System” in IEEE Xplore (ICWITE 2025). DOI: 10.1109/ICWITE64848.2025.11307133 [\[link\]](#)
- **Presented** Research paper "Real-Time Digital Water Level Monitoring System" at **ICCCNT 2025, IIT Indore**
- **Hackathons:** Won **5 national-level 24-hour hackathons**, showcasing innovation, problem-solving, and teamwork.
